Electric Jacket Stripper

MCM Cosmic  
Wire Processing Machine

Rotary Jacket Stripper

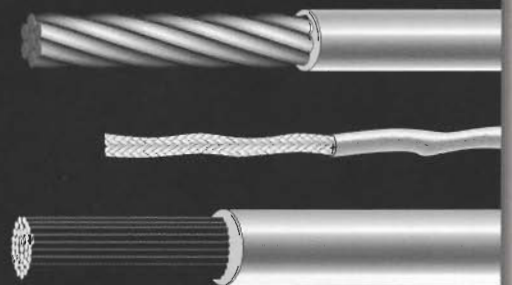

# Cosmic 60R

Cosmic 60R

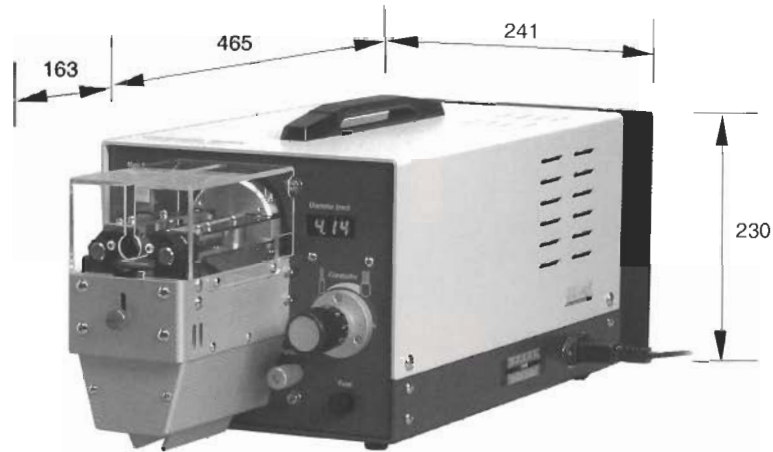

**Patented rotary blade centralizer system,  
for larger diameter multi-conductor cable.**

- Possible to strip different wire size without changing the blades.
- Easy to adjust cutting diameter by micrometer dial knob.
- Digital display for stripping diameter.
- Easy to select full or partial strip.
- Powered by electricity only.
- Optimal cutting performed by rotary blade system.

**MCM COSMIC K.K.**

The **Cosmic 60R** is designed for jacket stripping of multi-conductor or single cable. Its patented rotary blade centralizer system can strip various insulation material cables without changing the blades. It comes equipped with a digital display for setting the wire and cable diameters.

### Technical Specification

- Workable wire section : AWG14~AWG5
- Stripping length : 20~90mm
- Partial stripping length : Minimum 10 mm
- Insulation material : Teflon Rubber etc.
- Machine cycle : Max 5sec
- Blade material : Tool steel/Carbide (Optional)
- Electrical requirement : AC110V or 220V 120VA
- Net Weight : 20kg
